EDUCATION

Bachelor of Computer Applications (BCA),
CIMAGE College

2022 - 2025

TRAININGS / CERTIFICATIONS

Web Application Development

Sep 2024 - Oct 2024

IBM, Virtual

This course, provided by IBM, has been an incredible learning experience. Throughout the course, I gained a deep understanding of full-stack development processes and mastered the fundamental skills of full-stack development. I worked on multiple projects, applying what I learned in real-world scenarios. In addition to development, the course also taught me how to debug and test my code effectively. By the end, I learned how to deploy websites on hosting platforms and successfully deployed several projects. Finally, I took the final test conducted by IBM, and I'm proud to say that I achieved a high rank and received a completion certificate from IBM.

Front End Developer

May 2024 - Jun 2024

IIT Bombay Remotely Conducted, Virtual

Front End Developer

Jun 2024

IIT Bombay Remotely Conducted, Virtual

Young Professional

Sep 2023 - Oct 2023

TCS, Virtual

This training was very useful for me in this i learn about communication skill. ppt presentation skill . Block Chain many more thing . I learn during the training.

PORTFOLIO

PROJECTS

[Free premium Courses ↗](#)

Aug 2024 - Oct 2024

This website is made By using Next.js . I can proudly Say that i create a premium website with full responsiveness By Next.js In backend I mongodb as Database. In this i create Authentication process with separate user and admin. I create authenticated route . many more thing like search bar many more. Please you can check my website it is deploy by vercel.

[Modern to-do app ↗](#)

Sep 2024

Modern to do app with pagination and search bar. (Tip:- Dark mode not available)

[Chat GPT clone ↗](#)

Aug 2024

I can't provide you link of this project Sorry for that. because of in this i created two server client and backend. I have not subscription of like hostinger or any other platform which host both at one place . Due to this i host only backend on render.

[Business analysis with Recharts ↗](#)

Oct 2024

[Auth with supabase ↗](#)

[Natours tours app With Node js ↗](#)

Jun 2024 - Jul 2024

I create a natours app for booking tours. In this website user can login signup and see multiple tours. also user can track upcoming or recent tours . which is book by user. You can also receive welcome and forgot password main to your mail account. User can also do payment with credit card. I use Stripe for payment interfaces.

[Adventurer Tours Booking ↗](#)

May 2024

I create a Static website with full responsiveness. This website show some interesting and Adventurer Tour. i use advance and latest feature of css in this website. i Scss insted of css. you can check my website . Remember it is only static website now.
